

HIGH THROUGHPUT SURFACE TREATMENT ON COILED FLEXIBLE SUBSTRATES

ABSTRACT OF THE DISCLOSURE

- 5 One or more substrates may be coiled into one or more coils in such a way that adjacent turns
of the coils do not touch one another. The one or more coiled substrates are placed in a
treatment chamber where substantially an entire surface of the one or more coiled substrates
may be treated with a surface treatment process. One or more spacers may be placed
between adjacent layers of the coiled substrate before a full turn of the substrate has been
10 coiled around a carousel.
